

Create Virtual Machines

1.1 Windows Virtual Machine Creation

- Click one of the three different ways to create virtual machine.

- Once you click the above button, you redirect to the below page. Once we complete all the seven configurations from Basics to (Review + Create) your virtual machine will deploy.

- In the Basics menu,
 - Select the Subscription. (Azure for Students)
 - Select / Create Resource Group (Eg: CloudPractical)
 - Provide a name for your virtual machine. (Eg: seuslvm1)
 - Select the Region for your VM. ((US) Central US, (Africa) South Africa North, (Asia Pacific) Central India, etc.) – (US) East US
 - Select the Security Type. (Standard)
 - Select Operating System Image. (Windows 10 Pro, Version 22H2 – x64 Gen2)
 - Select the VM architecture. (x64)
 - Select a VM size. (Standard B1s - 1 vcpu, 1 GiB memory (\$7.59/month))
 - Complete the Administrator account. (Create username and password)
 - Complete the Inbound port rules. (Select RDP (3389))
 - Tick the Licensing.
- Click Next and it goes to the Disks menu, select the OS disk type. (Standard HDD)
- Tick the Delete with VM.
- Click next and it goes to the network interface. Do not need any configurations.
- Tick the “Delete public IP and NIC when VM is deleted.”
- Click next and goes to Management tab. If you need setup auto-shutdown facilities here.
- Click next, next, next and go to the Review + Create and check the green tick for the validation passed.

- Finally, click the Create Button. It will deploy your VM in Azure.

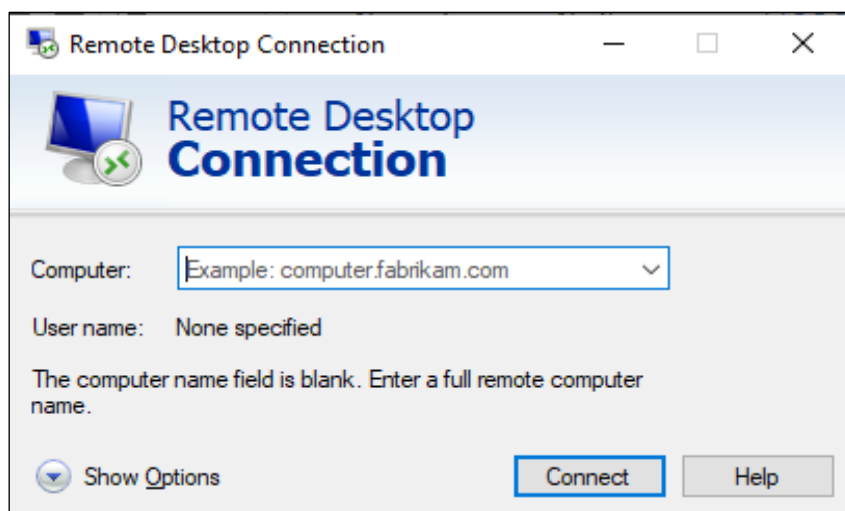

- **Access the Virtual Machine.**
- After the successful deployment, go to the home page and click “All Resources”.

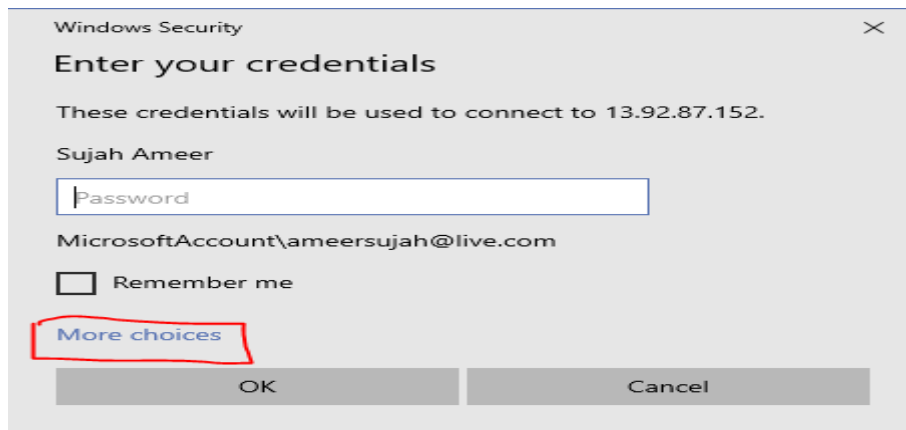

- Click your virtual machine and check the status. **(Current Status: VM Running)**

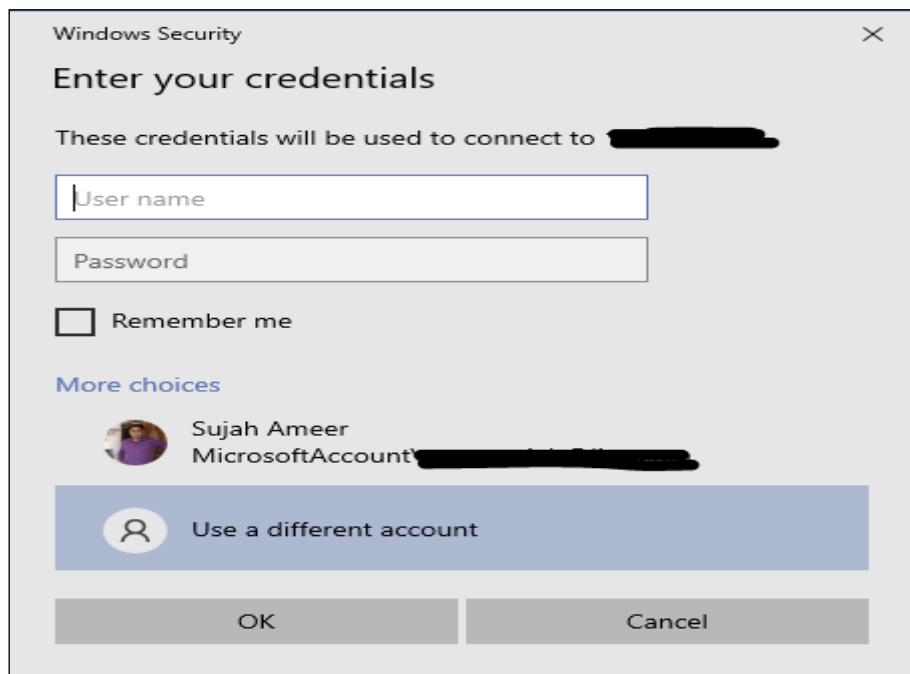

- If you need to do any modification in your VM, first stop the VM and do the changes.
- **In Windows, Open the Remote Desktop Connection.**

- Provide the public IP address and click connect.

- Click More choices and select Use a different Account.

- Provide the username and password that given while making the VM. Use your VM.
- **In Mac OS, install the Microsoft Remote Desktop.**
- Install from App store or using browser. Then provide the IP address and user credentials (username and password). Finally use the virtual machine.
